

ADOLESCENTVACCINATION.ORG

Adolescents are at increased risk of getting some serious infectious diseases but vaccines can protect them from more than a dozen potentially deadly diseases, including:

- **Meningitis**
- **Hepatitis**
- **Human papillomavirus (HPV)**

Talk to your child's healthcare provider today about vaccination

Visit adolescentvaccination.org for more information

**Remember, vaccination doesn't stop
at school entry!**

**National
Foundation for
Infectious
Diseases**
